LAUNCH DAY

Early posts did best

The biggest clips went up on launch day. Fresh posts on new pages are the fastest way to get more of these.

OF POSTS FROM ONE PAGE

Too few pages are doing the work

One page made over half of all posts. More pages means more views each day and less dependence on any single account.

05 · PLAN FOR THE COMING WEEKS

From the launch phase into the main push.

This week we are bringing **many more pages** onto the campaign.

STEP 1 OF 6

Onboard more pages, beyond Nigeria

We are widening the campaign from Nigerian pages to pages across other African countries, with about 25% of new pages aimed at the African diaspora. We are reaching out to:

- Davido fanpages, including OBO fanbase, 30BG and Davido clip and update accounts
- Meme, music and entertainment pages in Nigeria and other African countries
- Afrobeats and African culture pages
- Pages that serve the African diaspora

STEP 2 OF 6

Put Winnerman on screen

The first phase leaned mainly on Davido clips to pull in his fanbase. Now that the music is getting traction, pages will post more clips of Winnerman himself, so viewers connect the sound to the artist.

STEP 3 OF 6

Share what works

New pages get the top clips as examples, so their first posts follow the formats that already pulled 17K views.

STEP 4 OF 6

Keep every post pointing back

Every post must tag @winnermanuniverse and use the agreed sound and hashtags.

@winnermanuniverse

STEP 5 OF 6

Keep checking quality

Every post is reviewed before it counts, and fake views are never paid for.

STEP 6 OF 6

Report weekly

Next week's report will show views, new pages, top posts and progress toward the 1M views.
